

A hand-drawn diagram of a neuron. It features a central cell body (soma) with a nucleus inside, represented by a circle with a star-like pattern. Several dendrites extend from the cell body, some ending in small bulbous structures. A long axon extends from the cell body, covered by a myelin sheath represented by a series of small circles. The axon terminates in a branching structure.

A hand-drawn floor plan of a two-story building. The plan is divided into two main sections by a central vertical corridor. The left section contains rooms numbered 1 through 13, and the right section contains rooms numbered 14 through 24. The rooms are arranged in a grid-like fashion. The plan includes various architectural details such as doors, windows, and furniture. Handwritten notes in Russian are present, including "Построй" (Build) and "Построй" (Build). The drawing is on a grid background.
